

Fairfax Imaging, Inc. Named to Software Magazine's 27th Annual Software 500

Software Magazine Ranks Fairfax Imaging as one of the World's Largest Software Companies

Tampa, FL, Sept. 16, 2009 -- Fairfax Imaging today announced its inclusion in Software Magazine's Software 500 ranking of the world's largest software and service providers, now in its 27th year.

"It is a testament to the entire team at Fairfax Imaging Inc. that we have been included in this list," remarked Michael D. Minter, VP of Sales and Marketing. "We have shown steady growth since 1994 and are excited that our expansion allows us to be included on this prestigious list."

"The 2009 Software 500 results show that revenue growth in the software and services industry was healthy, with total Software 500 revenue of \$491.3 billion worldwide for 2008 representing 8.8% growth from the previous year," says John P. Desmond, editor of Software Magazine and Softwaremag.com.

"The Software 500 helps CIOs, senior IT managers and IT staff research and create the short list of business partners," Desmond says. "It is a quick reference of vendor viability. And the online version to be posted soon at www.Softwaremag.com is searchable by category, making it what we call the online catalog to enterprise software."

The Software 500 is a revenue-based ranking of the world's largest software and services suppliers, targeting medium to large enterprises, their IT professionals, software developers and business managers involved in software and services purchasing.

Go to www.Softwaremag.com and click on Subscribe to be among the first to see the 2009 Software 500. It is being released first in the digital publication to be distributed in mid-September.

The ranking is based on total worldwide software and services revenue for 2008. This includes revenues from software licenses, maintenance and support, training and software-related services and consulting. Suppliers are not ranked on their total corporate revenue, since many have other lines of business, such as hardware. The financial information was gathered by a survey prepared by King Content Co. and posted at www.Softwaremag.com, as well as from public documents.

About Fairfax Imaging, Inc.

Established in 1994 with offices in California, Florida, Illinois, New Jersey, Texas and Virginia, Fairfax Imaging developed its own processing software, *Quick Modules*. *Quick Modules* offers the industry a highly successful and award winning forms and remittance processing solution. Currently *Quick Modules* systems process billions of dollars in payment items and millions of transactions per day; across many industries, both government and commercial.
